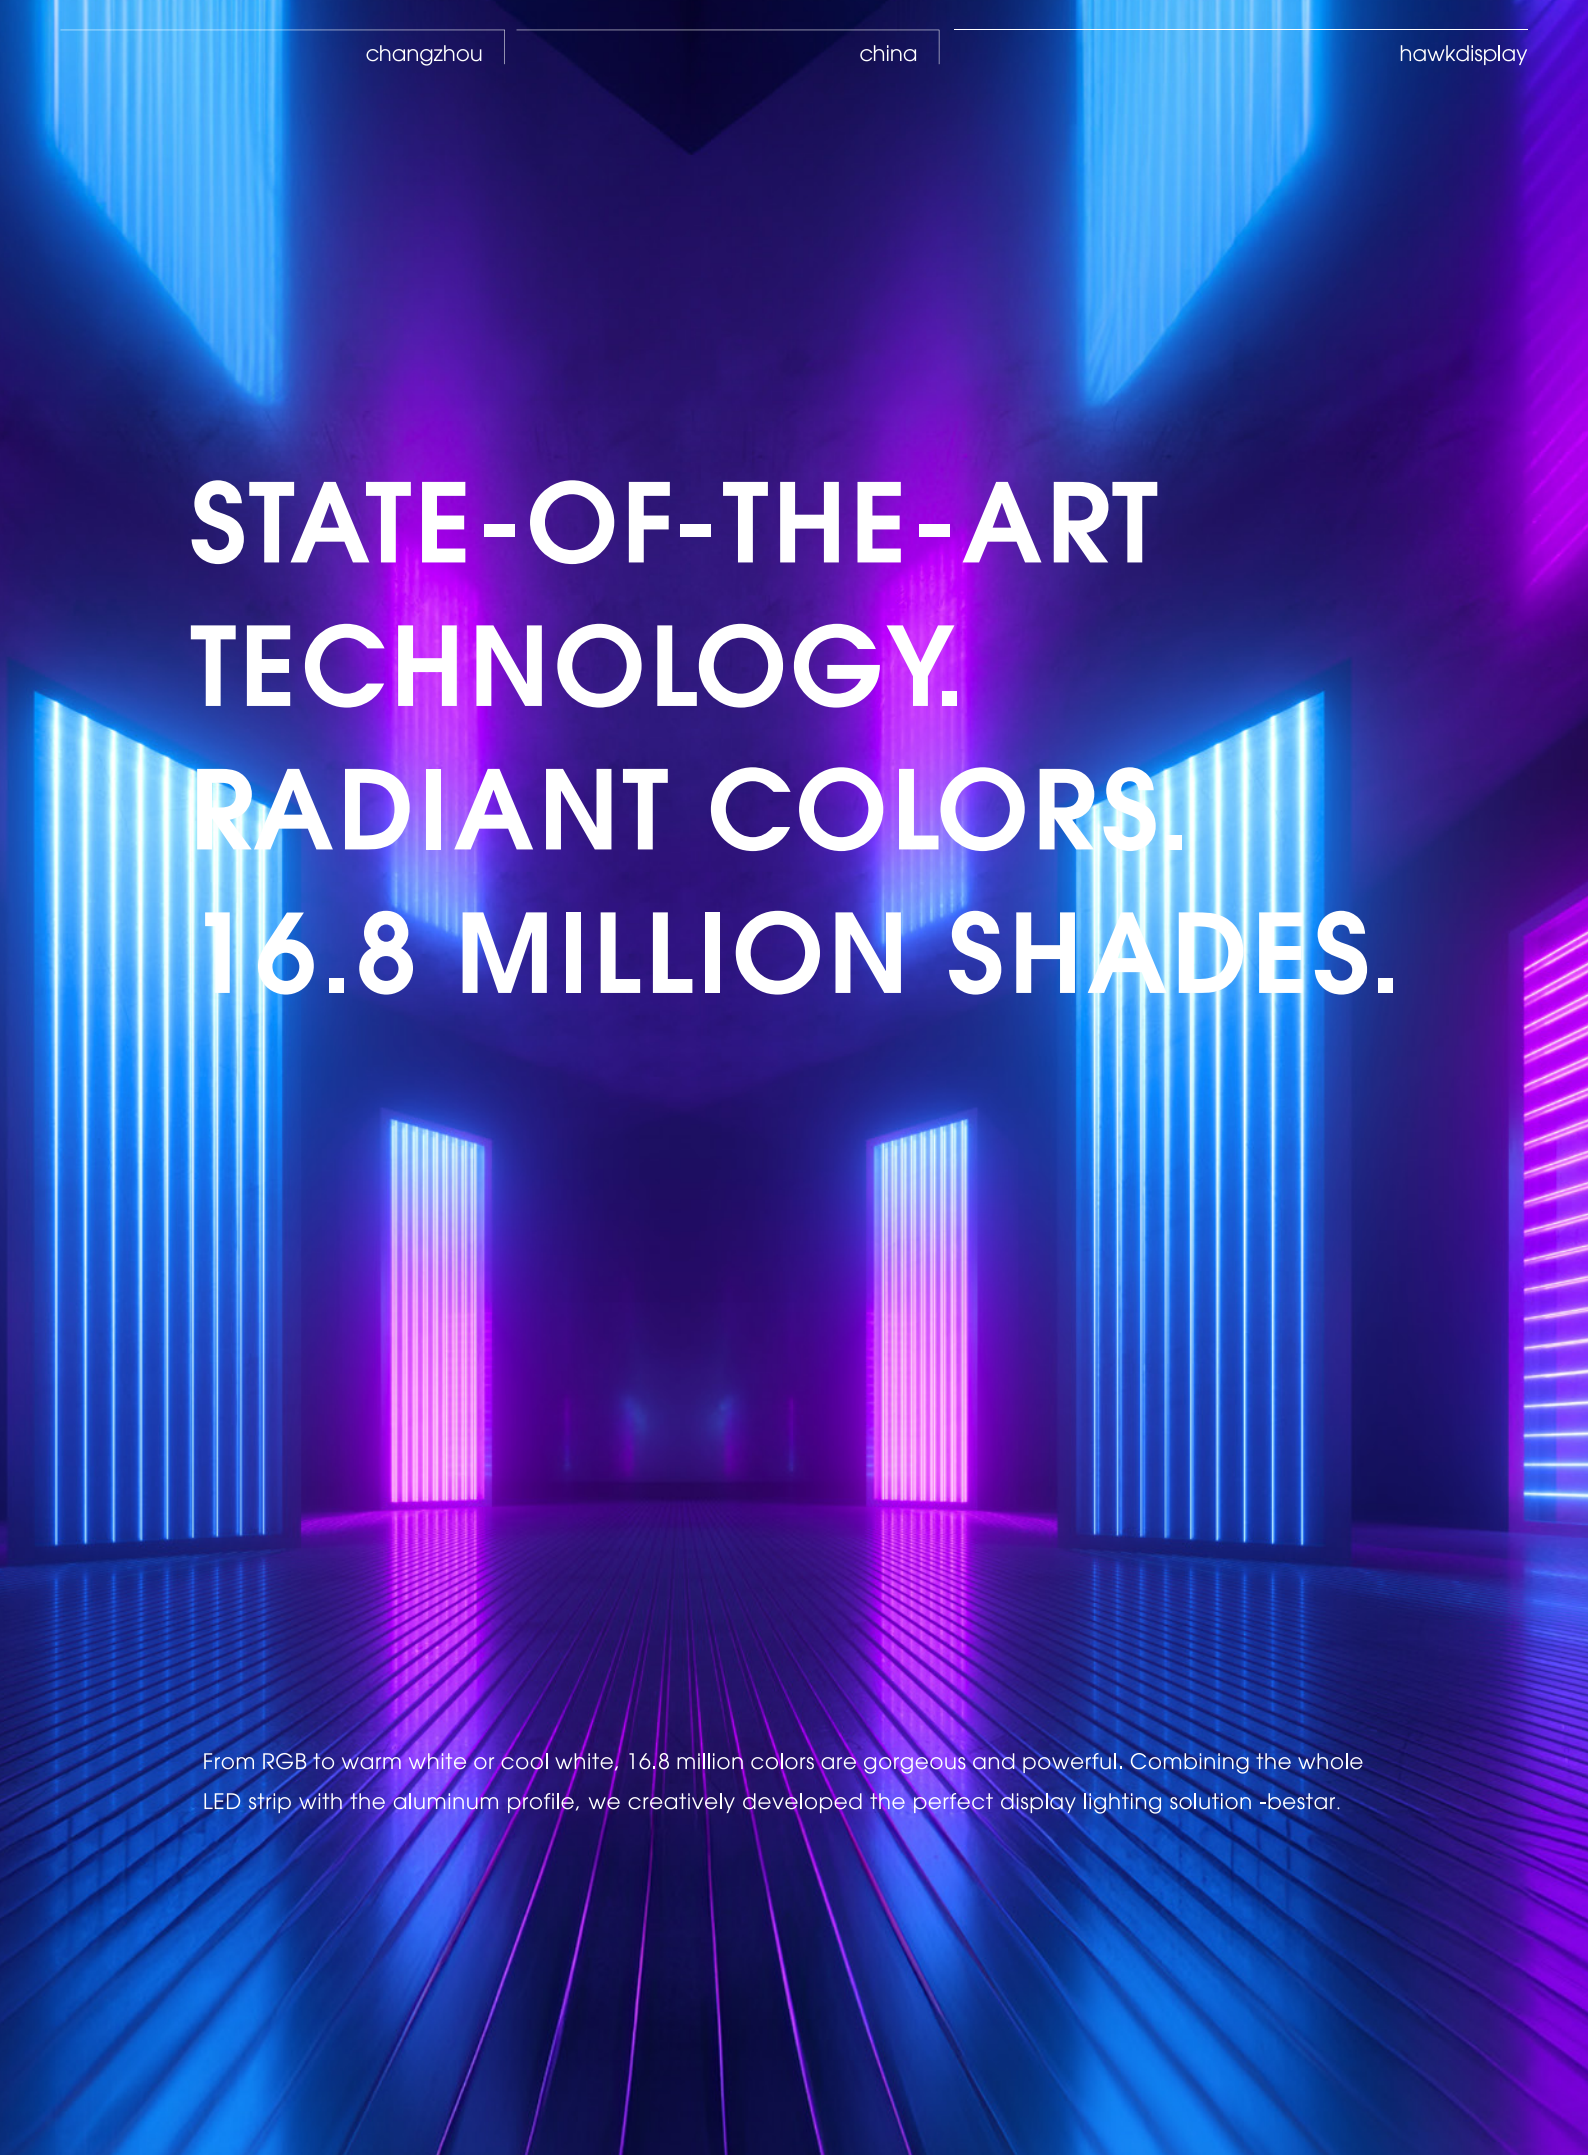
Extend The Future

With Light

CHANGZHOU · **CHINA**

Thinking about.

Urban lighting is everywhere in big cities, not only to provide lighting, but also to make the city's night glow. Good lighting not only let us imagine the future, but also let us feel the retro culture. Now, lighting is leading the trend of exhibition, more and more booths use a large number of lighting effects to do booth lighting, making the booth effect flowery color, eye-catching. How to apply this effect to your booth and product demonstration, this is our thinking.



STATE-OF-THE-ART TECHNOLOGY. RADIANT COLORS. 16.8 MILLION SHADES.

From RGB to warm white or cool white, 16.8 million colors are gorgeous and powerful. Combining the whole LED strip with the aluminum profile, we creatively developed the perfect display lighting solution -bestar.

Dazzling light **display system**

1. Embedded led strip, smooth surface, good light transmission, unity is good.
2. Simple assembly, only a simple tool, one person can install.
3. Perfect fit with a variety of display systems, adding light and color.
4. Use a wide range of scenarios, exhibition display, product demonstration, artisitc decorations, fast display and so on.

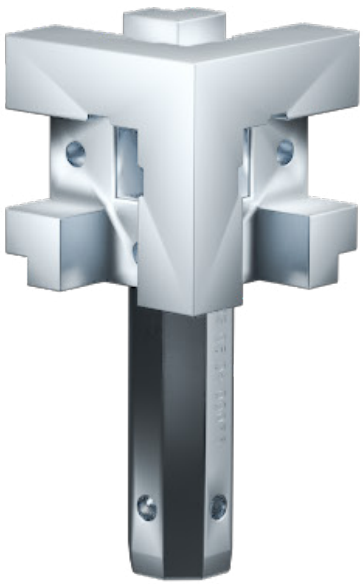
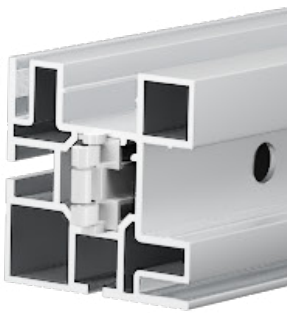
How To Connect **And Fix**

Through the corner tee connector accessories,
only need a simple tool,
one person can finsih the complete installation,
easy and simple

LED Strip Light Without Interruption

For the continuous effect of the led strip, we used a design structure to make the led strip perfectly connected, no matter how connected, the led strip can remain on.



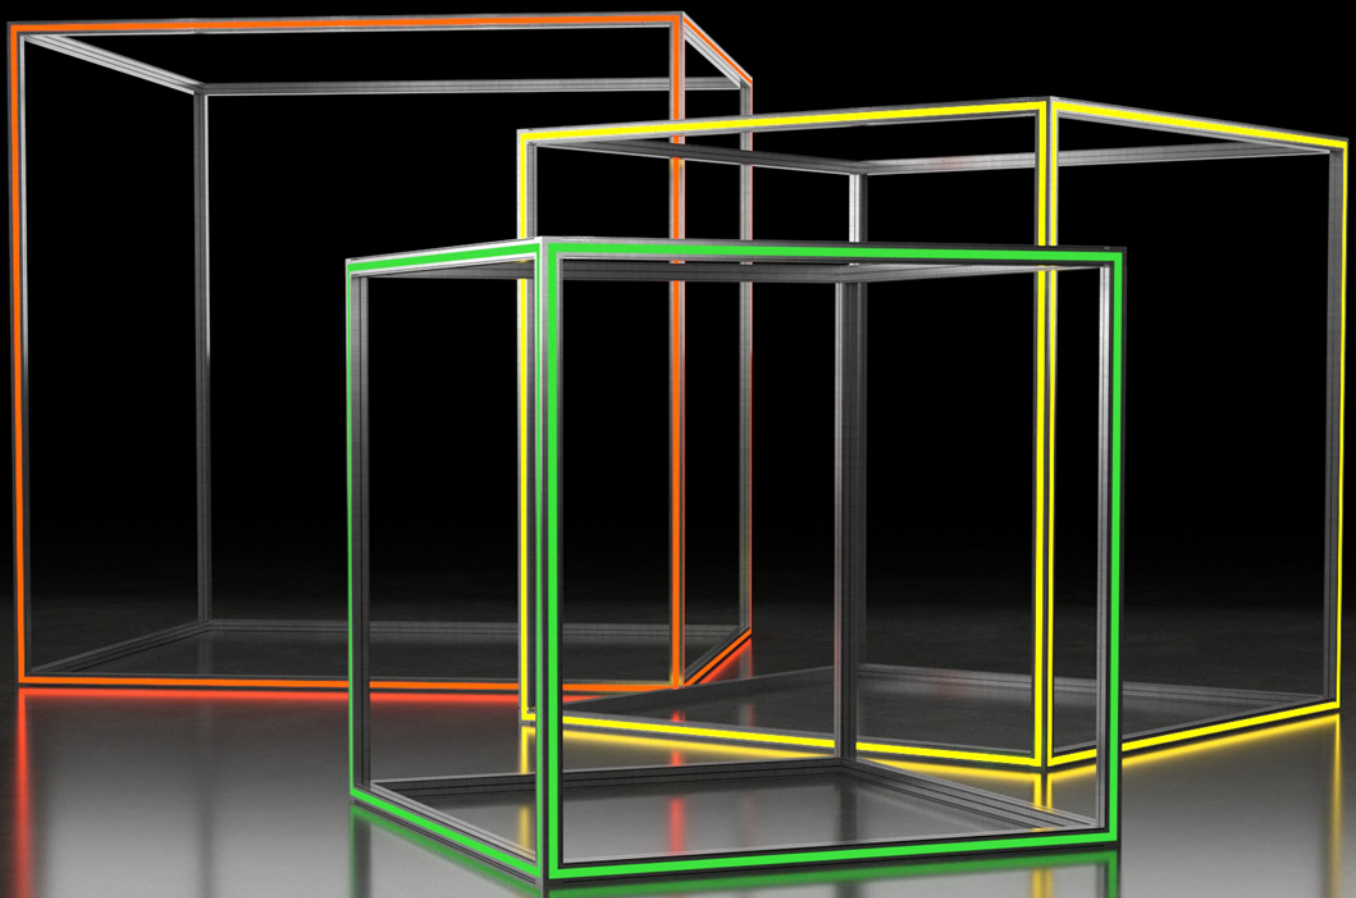


High Strength Aluminum Alloy Material Silicone Cover

embedded in the interior, the surface of the silicone cover, good light transmission, uniform light.

LED High Brightness And Long Life

brightness led strip, uniform color, long life, durable. Can withstand multiple uses without replacement.



Light Brings
Endless Possibilities

Yellow for energy, red for enthusiasm,
Different light colors may show completely different effects.
The combination of light and display design can express a variety of atmospheric effects.
bestar dazzling light display system, the perfect solution for light and display design.
